

Core competencies:

- **Cooling- and heating cylinders**

- **Axles & Shafts**

- **Hard chromium plating & grinding**

- **PU - coatings**

Engineering
+ Industrial services

If necessary we are on site and check what you need and rebuild

Complete production including logistics and packaging service

Design - Construct

Materials procurement

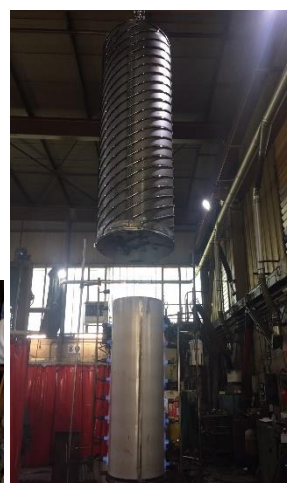

Produce and write protocol

Coating and refining

Checking and packing

Certify

Shrinking and welding in the UP process.

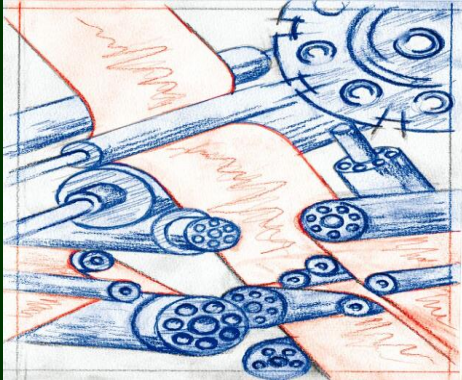

PU – Coating until Dm 1500mm

Completely manufactured and seaworthy packed in transport rack secured

Bernie Meier and his team have been operating for over 40 years in the industrial environment of plant engineering and construction, particularly in the field of coating machines for paper, films and non-woven products

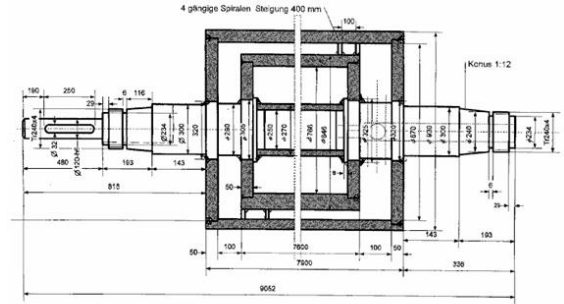

Make new.....out of old!

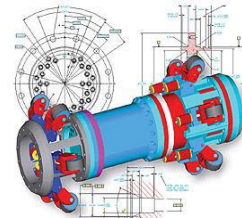

We process all types of material. Turning, milling, welding and machining layers according to a specification or a calculation

From layout to manufacture

Wasser durchfluss 110 m³/h Druck an der Walze min 4 bar

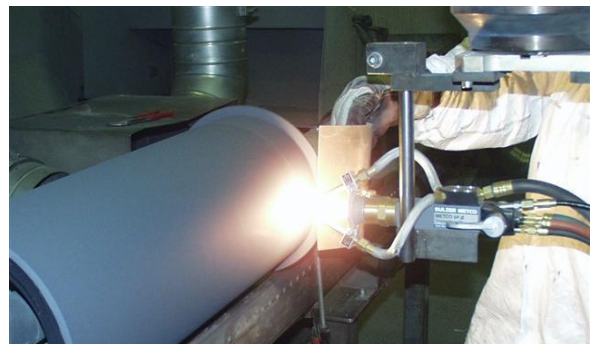

Flow-through thermal transfer strength calculations, static and dynamic calculations according to specifications.

Certified and state-approved welders

Thermal coating - hardening and much more in special plants

We manufacture from soft or hardened raw material.

We advise you on the choice of material

We help you with the design to optimize the manufacturing solution.

Of course we are always available for all further technical questions and inquiries.

Rolls, shafts and cylinders in continuous processes is and was our profession.

We would like to share with you our technical fund and network which has been built up over the last 50 years by Paul and Bernhard Meier.

TÜV, ASME, GOST, PED u.
Stoomwezen certifications.

Our services are in
Switzerland – Germany
– Italy – Slovakia
